**Summary** — Experienced Full-stack Software Engineer with 1.5+ years of hands-on experience and prior internship in Node.js. Proficient in developing scalable and high-performing web applications using Angular 14-20, Node.js, and MongoDB. Demonstrates a strong command over JavaScript/TypeScript, consistently delivering production-ready and maintainable code across the entire stack.

## Skills

|                                                                  |                                                                                                          |
|------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Frontend</b> Angular (v14–20), HTML5, SCSS, Responsive Design | <b>Design/UI</b> Figma to Code, Dashboard UX, Angular Material                                           |
| <b>Backend</b> Node.js, Express.js, REST APIs, WebSockets        | <b>APIs</b> Google Maps, Marker Clustering, Location Services, Stripe, Xendit, GCash Payment Integration |
